

JOAQUÍN PUENTE

Student of Computer Science Engineering and Applied Mathematics.

PROFESSIONAL EXPERIENCE

Transacdigital S.A. (Paggo)

Full-Stack Software developer

March 2025 - Present

This role entails the implementation, programming, and testing of emerging business requirements for the Paggo application, aimed at delivering an optimal experience for businesses in every transaction. The SCRUM methodology is employed to accomplish these objectives.

Internacional de Calzado S.A. (Calzado Roy)

Full-Stack Software developer

Dec. 2024 - Feb. 2025

The role entails designing, leading, and developing Full Stack projects for internal use within the company. Furthermore, it is also responsible for delivering IT systems support to various stores.

Evolución de negocios S.A.

Internal Technician

November 2021 - June 2023

This role entails executing technical responsibilities within the organization to uphold internal order and enhance process efficiency. Responsibilities encompass monitoring the internal network, delivering technical support, implementing software solutions, and developing control instruments.

ABOUT ME

I am proactive, charismatic, resilient, and exceptional. I take pleasure in confronting and addressing the challenges that emerge daily. I am capable of resolving any issue that presents itself, and I am eager to acquire new knowledge each day. I approach problems with a mathematician's mindset and resolve them with an engineer's methodology.
